

Please Come and Join Us
Colonial Creosote Superfund Site
Availability Session
June 6, 2017

Plans are underway for the U.S. Environmental Protection Agency (EPA) to conduct a phased Remedial Investigation/Feasibility Study (RI/FS) at the Colonial Creosote Superfund Site. Access agreements have recently been secured from the owners of properties where EPA will collect samples for this phase of the investigation. EPA will provide site updates to the community throughout the Superfund process and offer insight on how the public can participate in this effort.

This is not a public meeting.

Please mark your calendar and plan to attend EPA's Availability Session on:

Date: Tuesday June 6, 2017

Location: City of Bogalusa's War Room
Washington Parish, Louisiana
202 Arkansas Avenue
Bogalusa, Louisiana 70427

Time: 5:30 pm – 7:00 pm

This availability session is being held in a fully accessible facility. Should you have specific needs or questions about this facility's compliance with the Americans with Disabilities Act requirements, please contact Janetta Coats, U.S. EPA Community Involvement Coordinator, at 1-800-533-3508 (toll free) or 214-665-7308 (direct line) or email: coats.janetta@epa.gov

We look forward to your participation!
